Reason:

Hello, during today's races I rounded the first up wing mark 1st in the first 3 races, however on the rich and downwind the kite was very unstable and was collapsing. I couldn't ride it and 3-4 people were passing me. I new something was wrong with the kite. After a 2hr inspection of the kite I found that one of the sections inside the kite is broken. I believe it happened during the last day of racing at SOF where I crashed on downwind. I didn't ride the kites since.
