Back wing/fuselage: G444312 10490467

Reason:

The foil has been ventelaiting all week.

Has had small bumps on it. After talking to Bruno he advised me to try to fix it and if it didn't work still after all that to change it.

I tried everything but I am still having same problems.

It is seriously dangerous to ride. I had many big crashes caused by it during the week.

Response: Approved
