Notice:

Equipment Registration

During the World Championship, a new online equipment registration platform will be used. This system requires each competitor to set up an individual account but allows you to update your submission at any time.

Please begin the registration process as soon as possible, using the information you already have — even before arriving at the venue.

Sail Measurement

Following a decision of the Executive Committee, sails may be selected for measurement during equipment inspection for statistical purposes.

These measurements will not be made public and will not constitute grounds for protest.
