

# Singapore National Sailing Championships 2024

## Question for Officials

**Date: 2024-09-03**

---

**Question No: 02**

**Question For: Race Committee**

**Question:**

How is it that the second race started without giving participants enough time to get to the start line. Me and another participant did not even manage to get to the start line before the race started. This is because the wind was too small for us to get there on time. I do not have a coach so I was not aware that the race was due to start before the AP flag was taken down. Which meant that I only started to sail towards the start line when I heard first warning signal. Still this was not enough time.

---

**Answer:**

Race Officer lowered the AP flag and gave everyone enough time before he raised the Warning Signal Flag.

It's the sailor's responsibility to observe the flag signals and not coach.

Everyone is on the same course with the same amount of wind.

Everyone should stay close to the RC boat and standby for the next race. Race Officer will start within the time given.
