

2024 RVYC Fall Dinghy Regatta

Question for Officials

Date: 2024-09-27

Question No: 01

Question For: Organizing Authority

Question:

1. There is a requirement in the Notice of Race and Sailing Instructions that each boat carry a buoyant towline, in ILCA 7, at least 15 m long and 8mm in thickness that is attached to the boat. That's a massive towline! Is an ILCA 7 mainsheet, which is attached to the boat, considered to meet this requirement of the Sis and NOR, provided it is buoyant?

Answer:

An ILCA 7 mainsheet does NOT meet the towline requirements of the NOR / SI - there must be a separate towline, that meets the specifications of NOR 1.3, attached to the mast.
