## Question for Officials

**Date: 2025-09-14**

---

**Question No: 04**

**Question For: Protest Committee**

**Question:**

Hello again jury.

I looked at Vakaros again and it seems you made the right decision based on its images. Strange though that, at the same time it gave an accurate view on the approach of the mark and our right of way against the Italisan boats, it did not give a picture of the reality at the rounding moment. The fact was that we had about 0,5 meter of water left between the Italian baots and the mark, thus touching both the mark and those boats.

Conclusion - Vakaros is good but not at all 100 % accurate. Might it be that the mark gps signal is not precise?

Ingvar Krook

---

**Answer:**

Thank you for accepting the decision.

We need to end this subject, see you at another event in the future.
