

# Aramex Dubai to Muscat 2026

## Question for Officials

**Date: 2026-01-22**

---

**Question No: 04**

**Question For: Race Committee**

**Question:**

Is it permitted for competitors to view or reference publicly available Yellowbrick tracking data during the race (i.e., the same delayed fleet positions available on the public Yellowbrick tracking website)?

For avoidance of doubt, this includes any alternative formats of the same data made available by Yellowbrick (including XML), where the information is identical and publicly available via links on their website.

If the answer is no, please point me to the specific Rule/NOR/SI clause that would restrict such.

---

**Answer:**

Yes it is permitted to view or reference publicly available tracking information in formats available to all. See RRS 41 and WS Case 120
