Question for Officials

Date: 2026-05-01

Question No: 06

Question For: Race Committee

Question:

We have been made aware that our ORC certificate does not have the correct terminology for the section "Non-manual Power Controls - Spinnaker Retrievals". On our ORC certificate this is listed as "No". We operate our spinnaker retrieval system using manual power (people grinding a winch). We do not have non-manual power. We did not know that the answer on the Certificate should be recorded as "Manual".

We would like to request that we are able to continue to race using our "manual spinnaker retrieval system". Could we please have an urgent answer so that we can continue to race with this today (Friday).

Appreciate your consideration on this
