

2021 World Sailing Youth Championships

Question for Officials

Date: 2021-12-12

Question No: 01

Question For: Technical Committee

Question:

Is it allowed, only in between races, so while not racing, to have Bluetooth connection between the sailors and the coach, to avoid shouting from the coach boat, and to avoid close contact between boats? This device will be in the lunch bag, and will not be on board while racing. I can not find anything against this. (Forward wip communication device, range upon 500 meter).

Answer:

The use of any communication device is allowed while not racing.
