Kiteboarding is by its nature an unpredictable sport and therefore involves an element of risk. By taking part in the event, each competitor agrees and acknowledges that:

# ADDENDUM 2

## FREESTYLE SCORING AND JUDGING CRITERIA

---

*Note: this addendum may be updated at any time before the start of the competition*

Every competitor will perform a single trick one at a time respecting the order in the elimination ladder. The total number of attempts will be stated in the Local Sailing Instructions.

Every competitor will have a time limit to perform their trick attempt according to the Local Sailing Instructions. Once the time has elapsed the competitor will lose the ability to perform that trick and loses his attempt in this round. The Competition Director may re-start the time if there is strong evidence that the competitor could not perform within the time limit due to an abrupt wind change or because of an external obstruction. i.e. interference from another competitor.

The total score of a competitor is the sum of

- Their best individual trick score on a kicker (alternatively two best scores in both directions, if feature is available for both stances)
- Their best individual trick score on a slider (alternatively two best scores in both directions, if feature is available for both stances)
- Their best individual air-trick score

Competitors must perform according to the below judging key elements to maximize their scoring potential. Judges analyze the following major elements when scoring each individual trick.

Each individual score will be based on the following criteria

- **Technical Difficulty** – The technical difficulty of a trick
- **Power** – The power during the execution of the tricks. Power will be considered as a combination of:
  - Speed into the trick
  - Height and amplitude of the trick
- **Height** – Height of the trick completed during the heat. This aspect will exponentially come into consideration as the wind conditions increase, but only when the height is achieved along risk factor and technical difficulty
- **Variety** – The variety of tricks completed during the heat is considered in the maximum number of different tricks to be counted for the final score per trick category
- **Risk factor** – Is directly linked to the Power involved in the execution of the tricks, but also to the commitment of the competitor, technical and physical challenge during the execution, duration of the critical moment, amount and quality (lines direction) of the air in the trick, and energy on the execution.
- **Smoothness** – Smoothness and fluidity during the execution and landing of tricks completed during the heat
- **Innovation** – Tricks that have never been landed in competition before

## **Other judging aspects**

Judges may give credit to a landed trick that is not a crash when

- a competitor butt-checks when landing the trick but keeps riding and control the kite.
- a competitor grabs the “chicken loop” to regain control of the bar

The credit given to a butt checked trick is directly related to the risk factor involved in the execution of the trick. For tricks with a high degree of risk factor, judges won't deduct points for a butt-check landing.

Any kiteloop or downloop handlepass combination trick will be scored under the corresponding trick category as performed without the kiteloop or downloop.

Any rewind handle-pass combination trick will be scored under the corresponding trick category as performed without the rewind.

Any grab combined with a trick, will increase the technical score of the trick only if it is properly executed.

## SLIDER TRICK FAMILIES

<b>Categories:</b>			
<b>Backside</b>	<b>Frontside</b>	<b>Switch Backside</b>	<b>Switch Frontside</b>
50-50 tailpress or 5-0 nosepress/nosegrind boardslide lipslide noseslide tailslide bluntslide noseblunt slide			

Variations can be done with adding rotation before or after the slide. It also is possible to hit 1 slider and do a clean multiple slide combo when the slider is long enough and/or different levelled.

### **Difficulty levels:**

From basic to advanced

Backside and frontside 50-50  
 Backside boardslide  
 Nose and Tail press (Nosegrind and 5-0)  
 Frontside boardslide  
 Backside noseslide  
 Frontside tailslide  
 Backside bluntslide  
 Frontside lipslide  
 Frontside noseblundslide  
 Frontside noseslide  
 Frontside bluntslide  
 backside tailslide  
 backside lipslide  
 Backside noseblundslide

### **ZEACH**

Any rail maneuver where the board is not solidly locked into the intended position.  
 Points will be heavily deducted when 'zeaching' occurs.

### **Nollie / Nose Ollie**

Nollie, or Nose Ollie is when you approach on your regular stance and Ollie with the nose. This does not change anything in the naming of the slides as you still approach the obstacle in your regular stance.

### **Fakie Ollie**

Fakie Ollie is when you approach on your switch stance and ollie with the nose, making it a backwards regular Ollie. This does change in the naming of the slides as you approach the obstacle in your switch stance.

**For example:**

When you approach the rail in goofy stance and frontside (as your regular stance) and do a ollie and a frontside boardslide, you will slide backwards (your back leads the way)

When you approach the rail in Regular stance and frontside, but Goofy is your regular stance, and then do a fakie Ollie and a boardslide, this will be a frontside boardslide, but your face will lead the direction.

When a rotation is done before starting the slide, look at the initial stance to name the trick correctly.

No matter how many rotations the rider does before the slide, this will not change.

**For example:**

When going frontside towards the obstacle in goofy stance.

When the rider does a frontside 180 towards the obstacle, and lands in 5050, the 5050 will be considered as a fakie 5050.

When going frontside towards the obstacle in goofy stance.

When the rider does a frontside 180 towards the obstacle, and lands in a press, look at the initial stance to determine the correct naming.

If the rider presses on the leading tip, it will be considered as a fakie 5-0

When a rotation is done before starting the slide, and that slide has been done before, it is the best attempt of these 2 that will count. Not both tricks.

This only counts when the slide is done in the same way, starting from the same stance.

When a rider goes into the obstacle from a straight line, the trick will be considered as the 'easiest' trick.

For example: When you go straight into an obstacle and do a boardslide, it will be looked at as a bs boardslide and not a frontside lipslide.

Switch is when a rider approaches the obstacle with his good foot forward.

If a judge hesitates which trick has been done because it was switch or had rotations going in the slide, always check the start stance to see which part of the board is tail or nose and then score accordingly.

Switch tricks will be scored higher when the execution is the same as the regular trick.

# ADDENDUM 4

## BIG AIR SCORING & JUDGING CRITERIA

---

*Note: this addendum may be updated at any time before the start of the competition*

Every competitor will perform a single attempt one at a time respecting the order in the run order. The total number of attempts will be stated in the Local Sailing Instructions.

Every competitor will have a time limit to perform their attempt according to the Local Sailing Instructions. Once the time has elapsed the competitor will lose the ability to perform that attempt and loses his attempt in this round. The Competition Director may re-start the time if there is strong evidence that the competitor could not perform within the time limit due to an abrupt wind change or because of an external obstruction. i.e. interference from another competitor.

The total score of a competitor is the sum of their two best attempts.

Competitors must perform according to the below judging key elements to maximize their scoring potential. Judges analyze the following major elements when scoring the overall impression of the competitor in each attempt.

- 1. Commitment and Height: how high does the rider go and how much commitment does he/she put in their trick/jump**
- 2. Combination: does the rider combines his jump with rotations, grabs or other.**
- 3. Style/Show: how does the rider executes his jumps. Are the grabs solid, rotations not dangling etc**
- 4. Smoothness: smoothness and fluidity during the execution and landing of tricks completed during the heat**
- 5. Creativity: how does a rider surprise the judges with new tricks or trick combinations.**

When a rider does not land on his board, the jump will be considered as a crash.

Handle passes are allowed but will only increase the score if they are a functional part of the above main judging criteria.

Flying will not be scored.
