### Scoring Inquiry:

Can you please review the calculation used to determine our corrected finish time in races 1- 4. For example, in race 3 our elapsed time was 4:42:22 and our Pred Upwnd High TOT rating is 1.4362. We calculate our corrected time as 6:45:32. In race 4 our Pred Upwnd TOT is 1.1604 and our calculated corrected time is 7:29:46. It's unclear what TOT rating was used for races 1 & 2 for us to check them - Could you please check them too.

Thank you for your help and let us know what questions you have.

### Response:

We used a digital file imported into the ORC scoring tool that enabled the Weather routing TOT scoring.

This has been the subject of numerous inquiries. We have been told by ORC not to share the files. I will confirm with ORC what can/should be shared *after* a race. If they permit more sharing you will see it on the ONB as soon as I can get it online. I am somewhat restricted by bandwidth, which is why today's scoring sheets have yet to be posted.
