Scoring Inquiry:

I am scored 12 in race 1 but I finished 7. I believe this is for a tracking not being returned penalty. I was not given the Velcro which was informed I should get at registration when picking up the tracker but wasn't given. I had to find a way to attach and used a piece of string. As the race went on the string obviously stretched and the tracker fell out. I informed the tracker man as soon as I could when coming ashore and told him about the problem. He said he would sort it out so I don't get a penalty as he understood the situation and issued me with a new tracker which I returned yesterday . Please could this be resolved

Witnesses:

Brett Lewis

Response:

In line with SI 20.7.4 there is a Standard Penalty for non return of the tracker, issuance of a replacement tracker does not overturn the failure to return the original.
