Scoring Inquiry:

Hi - we wondered if our redress of 36mins was taken into account in the final version of the scores. It doesn't appear to have been applied as our position was unchanged from the previous posting. Please could you check for us. Many thanks James

Response:

I have received your comment and am addressing it with the scorer to ensure you are properly credited with redress.

Update: The redress, when added, reduces your average lap time by 32 seconds and changes you from 47th place to 44th place. The revised set of results is being worked on and will be posted as soon as possible.
